DANG DUC CHINH

Full Stack Developer | React · TypeScript · Express
Da Nang, Vietnam | +84 397 912 441 | ddc150421@gmail.com
LinkedIn: linkedin.com/in/chinh-dang

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C/C++
Frontend: React, Vite, Progressive Web Apps (PWA)
Backend & Data: Express, FastAPI, RESTful APIs, MongoDB, MySQL, Cloudinary
Tools & Deployment: Git, GitHub, Docker, Linux, Vercel, Render
AI Integration & Tools: Groq AI API, ChatGPT, OpenAI Codex, Cursor, Claude, GitHub Copilot
Soft Skills: Communication, Problem Solving, Analytical Thinking, Teamwork, Time Management, Presentation

WORK EXPERIENCE

Backend Developer Intern — Team Lead
Shipway Delivery Company | Dec 2025 – Apr 2026

- Led backend development for a delivery and order-management platform, coordinating development tasks across team members.
- Designed RESTful APIs and client–server architecture; contributed to backend implementation supporting order placement and delivery workflows.

SELECTED PROJECTS

ZoDaNang — Full Stack Developer
React · TypeScript · Express · MongoDB · Groq AI · Cloudinary
Live Demo: https://zodanang.online

- Developed a full-stack travel discovery platform featuring location search, filters, interactive maps, saved places, and community reviews.
- Built RESTful APIs and integrated MongoDB and Cloudinary to manage travel listings, user-generated content, and media assets.
- Integrated a Groq AI-powered travel assistant for destination recommendations and trip planning.
- Deployed frontend services on Vercel and backend services on Render.

Edge AI Health Monitoring & Behavior Recognition — Graduation Thesis
Python · Raspberry Pi 5 · Polar H10 · Scikit-learn · SciPy · NeuroKit2

- Developed an Edge AI monitoring system integrating physiological sensor data processing and local machine-learning inference on Raspberry Pi 5.
- Processed ECG and accelerometer data, extracted 40+ HRV features, and implemented HistGradientBoosting and SVM–Random Forest ensemble models for cardiac-event and stress classification.

Autonomous SUMO Robot — Sole Embedded Software Developer
2023–2024 | ESP32 · Arduino · C/C++ · Embedded Systems

- Independently developed complete embedded software for sensor acquisition, opponent detection, motor control, autonomous navigation, and real-time decision-making.
- Implemented opponent searching, tracking, attacking, and boundary-avoidance logic; integrated sensors, motor drivers, and electronics with the mechanical platform and optimized control performance through iterative testing.

EDUCATION

The University of Danang – University of Science and Technology (DUT)
Bachelor of Engineering in Computer Engineering | 2021–2026

HONORS & AWARDS

- **Second Prize** — University SUMO Robot Competition (2024)
- **Third Prize** — University SUMO Robot Competition (2023)

LANGUAGES

Vietnamese: Native | **English:** TOEIC Listening & Reading 700
