DANG DUC CHINH

DevOps Engineer

Da Nang, Vietnam | +84 397 912 441

ddc150421@gmail.com | linkedin.com/in/chinh-dang-17792424b

TECHNICAL SKILLS

Linux & Operations: Linux, SSH, application deployment, application log inspection
Containers & Deployment: Docker, container fundamentals, Vercel, Render
Programming & Version Control: Python scripting, TypeScript/JavaScript, Git, GitHub
Web Services & Data: HTTP, RESTful APIs, client-server architecture, FastAPI, Express, MongoDB, MySQL
AI-Assisted Work: Codex, Cursor, GitHub Copilot
Systems & Services: Windows Server (AD DS, DNS, IIS), HAProxy, backup and restore
CI/CD & Monitoring: GitLab CI/CD, Kubernetes, ArgoCD, Prometheus, Grafana
Soft Skills: Problem solving, analytical thinking, teamwork, communication, self-directed learning

WORK EXPERIENCE

Backend Developer Intern - Team Lead

Shipway Delivery Company | Dec 2025 - Apr 2026

- Led backend development for a delivery and order-management platform; assigned tasks and coordinated work across team members.
- Designed RESTful APIs and client-server architecture; developed backend features supporting order placement and delivery workflows.

SELECTED PROJECTS

Edge AI Health Monitoring and Behavior Recognition

Graduation thesis | Python · Raspberry Pi 5 · Polar H10 · Scikit-learn · SciPy · NeuroKit2

- Integrated Raspberry Pi 5 and Polar H10 for physiological data processing and on-device machine-learning inference.
- Processed ECG and accelerometer data; extracted 40+ heart rate variability (HRV) features using SciPy and NeuroKit2.
- Implemented HistGradientBoosting and combined SVM-Random Forest models for cardiac-event and stress classification.
- Experimented with real-world user data and public medical datasets to support classification at the edge.

Linux and Windows Infrastructure Operations Lab

Personal lab | Linux · Windows Server · HAProxy · Prometheus · Grafana · restic

- Built two Linux application servers and an operations server; managed services with systemd, user accounts, and logs.
- Configured HAProxy load balancing and health checks; tested backend outages and traffic failover to the remaining server.
- Set up Prometheus/Grafana dashboards for CPU, memory, disk, and HTTP status; configured alerts for service outages.
- Implemented encrypted restic backups and verified restores using checksums; configured AD DS, DNS, Group Policy, and IIS on Windows Server.

Application Delivery with GitLab CI and ArgoCD

Personal lab | Docker · GitLab CI · Kubernetes · ArgoCD

- Containerized FastAPI with Docker, ran non-root containers, and checked the service health endpoint.
- Built GitLab CI pipelines for testing, image builds, and registry publishing; used commit SHA tags for traceability and rollback.
- Managed Kubernetes configuration through Git and ArgoCD for dev/staging; used ConfigMaps, Secrets, and readiness/liveness probes.
- Ran two replicas with resource limits; tested Git rollback and recovery from image, Pod, and worker-node failures.

EDUCATION

The University of Danang - University of Science and Technology (DUT)

Computer Engineering | 2021 - 2026

HONORS AND LANGUAGES

SUMO Robot Competition: Second Prize (2024), Third Prize (2023).
English: TOEIC 700
